

what is restoration gateway?

Restoration Gateway is restoring peace, hope, and love in northern Uganda by developing a Christ-centered model community that will foster God's heart for physical and spiritual restoration for the people of war-torn and AIDS-ravaged northern Uganda. On 500 acres along the Nile River, Restoration Gateway has an orphanage, school, and agriculture project, with plans to build a dental center, hospital, pastors' and children's retreat centers, job skills training school, and more.

IRS Compliance Statement:

Thank you very much for your contribution to the projects and/or missionaries of Restoration Gateway. Your gift to RG is tax deductible. Donations are solicited with the understanding that RG has complete discretion and control over all donated funds. In practice, RG implements donor instructions whenever possible. In case your gift cannot be used as you indicate, it will be applied to other related functions of Restoration Gateway.

the problem

After 20 years of brutal killing and terror from the Lord's Resistance Army (LRA), northern Uganda faces crises in multiple areas. Access to quality, affordable healthcare is limited, with the result that many treatable diseases are causing extreme morbidity and mortality. Consider that:

- 51% of households in Uganda do not have access to healthcare facilities.
- 60% of the nation's medical equipment is obsolete.
- The four area hospitals surrounding Restoration Gateway currently serve more than 1.1 million people spread across a large rural area.
- Malaria, respiratory infections, and diarrhea are the main causes of under-5 mortality. These diseases are treatable and the deaths preventable.

the solution

Northern Ugandans need greater access to quality, well-equipped, health-care facilities, staffed by well-trained personnel. Restoration Gateway will provide such a facility. We are building a clinic, which will expand into a full hospital. This facility will offer primary care, as well as training for Ugandan medical students and residents, and nursing students.

Short-term medical mission trips are helpful in addressing the immediate needs of a few, but not the chronic medical issues of the community-at-large. What is needed is a permanently staffed medical facility.

—Dr. Artie Sudan

how you can help

Reach out to the people of northern Uganda by helping make the medical clinic and hospital a reality. Together we can effect a change in these morbidity and mortality statistics. Please prayerfully consider the following ways you can help bring restoration to northern Uganda.

give The hospital facilities will be constructed in three phases with an estimated cost of \$250,000 per phase. All gifts, whether one-time or monthly, are appreciated. Your gifts are tax deductible.

go Until facilities are completed, visiting physicians provide temporary clinics in our multiuse building, or in remote villages with our mobile medical unit. There is opportunity for both short-term and long-term service.

pray This project is bigger than any single person and something only God can accomplish. Your prayers are greatly needed.
